TABLES OF TRIGONOMETRIC FUNCTIONS

On the following pages are given tables for the natural trigonometric functions, sines, cosines, tangents and cotangents, and their logarithms, for every minute in the angle. The logarithms are printed with heavier face type so that no confusion need result from the fact that both the logarithms and the natural functions are given on the same page. The values of the secants and cosecants are not given in these tables, as they are not generally necessary for the solution of triangles, and all the rules and formulas in Part I of this treatise (MACHINERY'S Reference Series No. 54), are given in a form which does not introduce these two functions.

Should, however, the values of these functions be required, they can easily be derived from the tables. The secant is found by dividing 1 by the cosine of the angle, and the cosecant is found by dividing 1 by the sine of the angle. Written as formulas, these rules would be:

$$\sec \alpha = \frac{1}{\cos \alpha}$$

$$\operatorname{cosec} \alpha = \frac{1}{\sin \alpha}$$

Example: Find the secant and cosecant of 15 degrees 42 minutes.

$$\sec 15^\circ\ 42' = \frac{1}{\cos 15^\circ\ 42'} = \frac{1}{0.96269} = 1.0387$$

$$\operatorname{cosec} 15^\circ\ 42' = \frac{1}{\sin 15^\circ\ 42'} = \frac{1}{0.27060} = 3.6955$$

The use of the tables has been fully explained in Part I, and it is, therefore, not necessary to give any further explanations here; if the use of the tables is not thoroughly understood, the explanatory matter found in Chapter V of Part I should be carefully studied.
